Celebrating the Mediterranean

PRIMA

Challenge

Small scale farming systems are the backbone of the Mediterranean farming system with an overwhelming contribution to the global food supply. However, many of the rural economies and smallholder farmers communities are struggling to sustain production, as low incomes, unsustainable and inefficient practices, lack of market connections and limited access to information are affecting their livelihood. Fragmentation of the markets, inefficient farming practices, older age group of farmers, the disconnection between youth and their interest in agriculture are enhancing land abandonment and degradation, output guality and productivity, transparent and efficient access to markets (especially new markets based on e-commerce) and lack of valorisation of waste generated at farming level. Many organisational aspects made to support farmers, that was brought in the 20th Century, did not evolve to meet the current market demands, including the current models of cooperatives and associations that need uplifting. There is a significant need to have proper governance, less corruption, improved market intelligence, the introduction of innovative approaches in sustainable practices, market development, investment and

Evaluation process

Each proposal is evaluated by 3 independent experts and ranked by consensus by the evaluation panel during a meeting

EUROPEAN PARTNERSHIP

Scoring and Evaluation Criteria

	Excellence (The following aspects will be taken into account to the extent that the proposed work corresponds to the description in the work programme)	Impact	Quality and efficiency of the implementation
Innovation actions (IA)	 Clarity and pertinence of the project's objectives and the extent to which the proposed work is ambitious and goes beyond the state of the art. Soundness propos internation of the gender dimension in research and innovation content and the quality of open science practices including sharing and management of research outputs and engagement of citizens civil society and end- users where appropriate. 	 Credibility of the pathways to achieve the expected outcomes and impacts specified in the work programme and the likely scale and significance of the contributions the project. Suita of the contributions of the dissemination and exploitation plan including communication activities. 	 Quality and effectiveness of the work plan assessment of risks and appropriateness of the effort assigned to work packages and the resources overall. Capacity ap of each part of each part of the end of the expertise.

Minimum Thresholds:

3 / 5 for each eval criterion 10 / 15 in Total

For IA Impact has a weight of 1.5

Recommandations

Don't wait the last minute. Simple process but takes time!

Be sure to submit PART I (and all the requested documents) and a detailed Budget

For section 2: Each partner must check its eligibility with his NCP **before** submitting a proposal
