## Topic 1.1.1 IA - Innovation Action

Upscaling Nature Based Solutions for sustainable water management to address extreme events in the Mediterranean

10.9 M €

4 projects

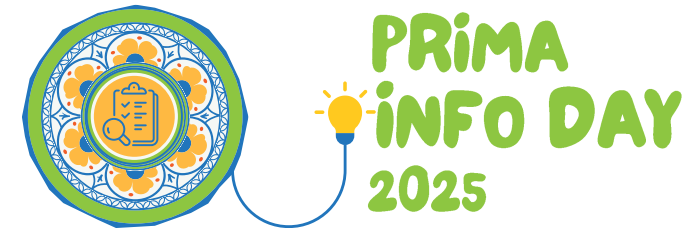

TRL 6-8

DEADLINE TO SUBMIT: **JULY 15 at 17H00 CET**

# Topic 1.1.1 2025 - Expected Outcomes

#PRIMAInfoDay  
www.prima-med.org

*Project results are expected to contribute to the following expected outcomes:*

1. Enhanced water management, climate resilience and adaptive capacity of ecosystems, human and ecological communities

2. Increased knowledge sharing and capacity building among stakeholders to design, implement, and maintain NBS.

3. Improved NBS M&E for their integration into (env., agri., urban) policies and climate adaptation/mitigation strategies, supported by innovative governance

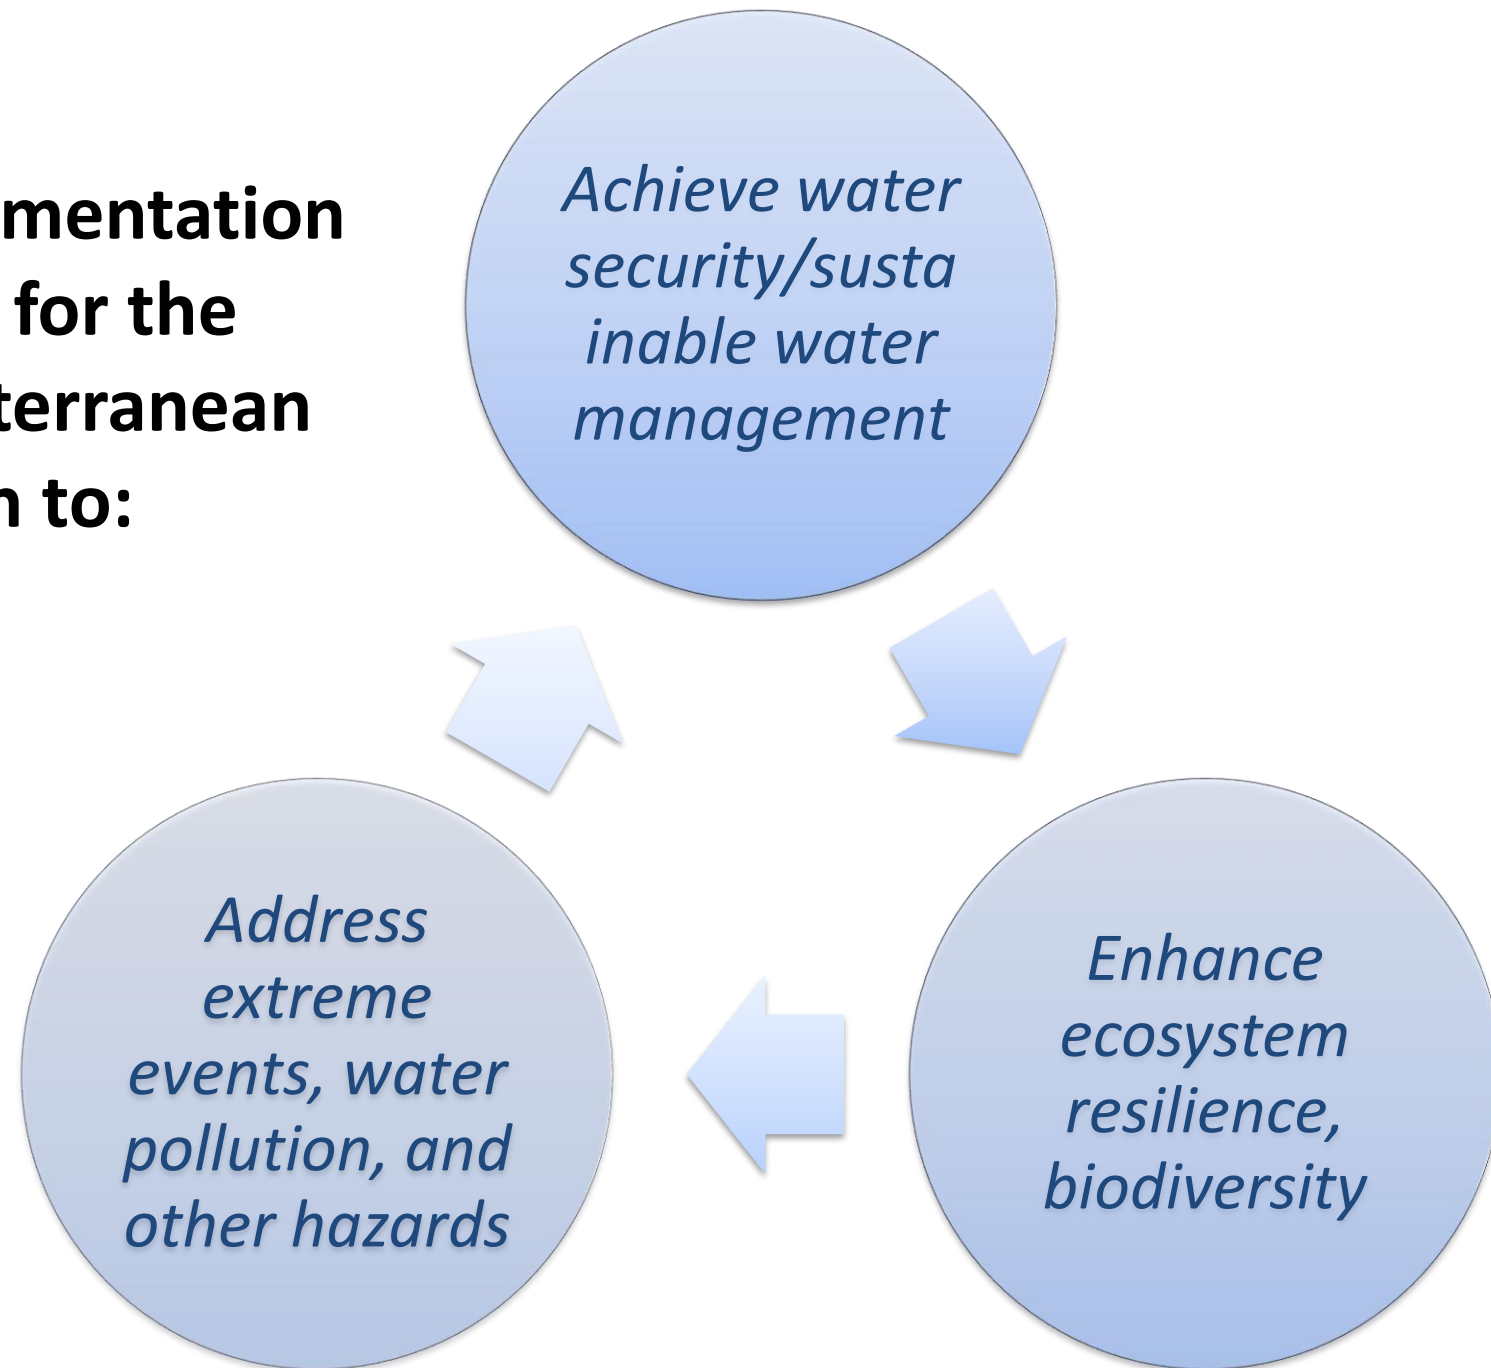

# Topic 1.1.1 2025 - Context

PRIMA  
INFO DAY  
2025

**NBS  
implementation  
is key for the  
Mediterranean  
region to:**

**...But  
challenges  
remain!**

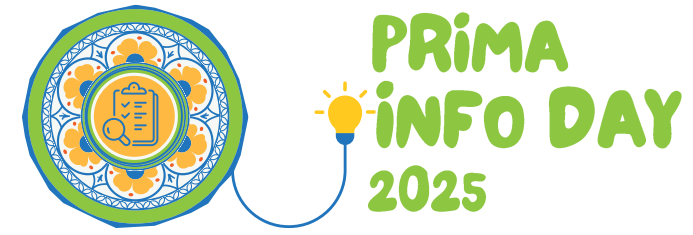

*For a definition of NBS please check UNEA - United Nations Environment Assembly resolution 5.5, 2022*

# Topic 1.1.1 2025 - Scope

#PRIMAInfoDay  
www.prima-med.org

- Identify NBS for different ecological and socio-economic contexts to address floods, droughts, water pollution and other hazards, the barriers to acceptance, and ways to redefine regulatory frameworks

- Test, validate, assess cost-effectiveness and benefits, and scale up NBS while improving ecosystem biodiversity and resilience, recharging aquifers and preventing soil salinisation and erosion

- Business models, governance approaches, and recommendations for NBS adoption and integration into policies, environmental and land use regulations

- NBS combination incl. with other kinds of solutions (hybrid infrastructure)

- Decision support tools for NBS selection based on environmental conditions and stakeholder needs

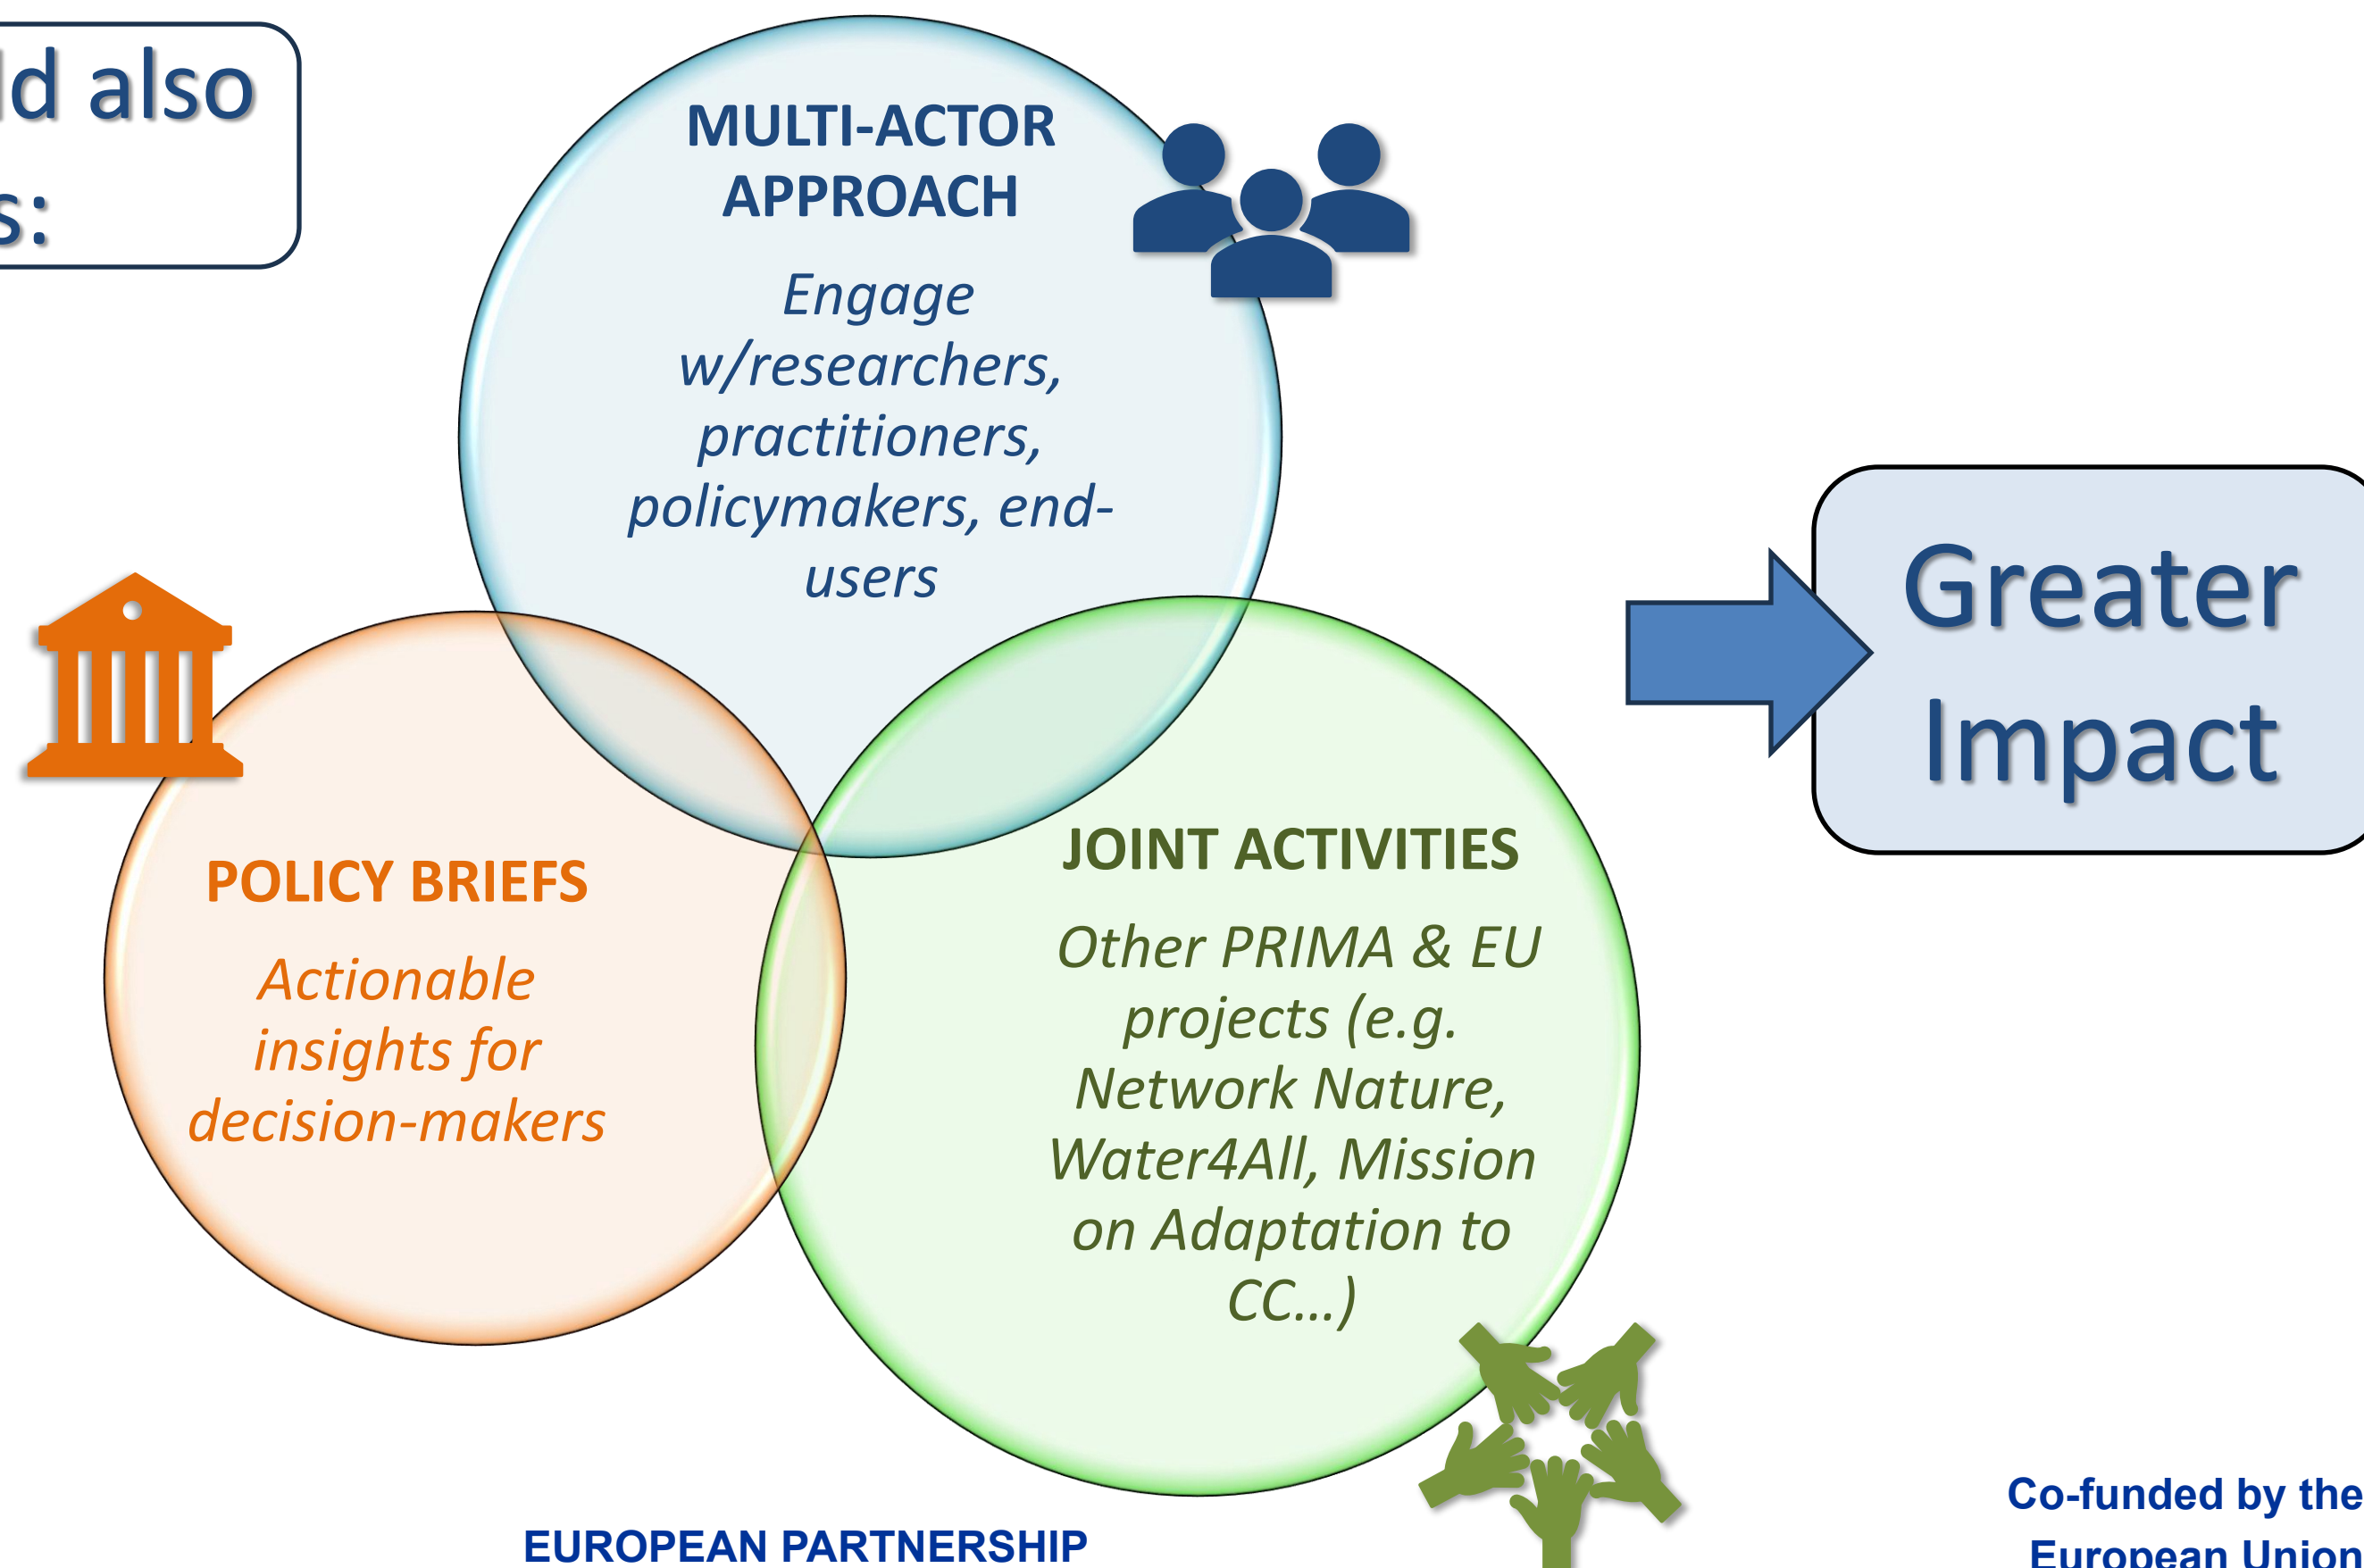

# Topic 1.1.1 2025 - Scope
